

INSTALLAZIONE plugin Mylyn per Eclipse

The screenshot shows the Eclipse Mylyn Downloads page. The browser address bar displays <http://www.eclipse.org/mylyn/downloads/>. The page header includes the Eclipse logo and navigation links: HOME, USERS, MEMBERSHIP, COMMITTEES, DOWNLOADS, RESOURCES, PROJECTS, ABOUT US. A search bar is also present.

The main content area features the Mylyn logo and a description: "The minimal Mylyn install is a standalone Task List. Optional Task Repository Connectors integrate the Task List with bug/task/issue trackers and project management tools. Bridges focus the user interface on the active task and installing all available bridges is recommended. The preferred way of installing is via the Update Manager (instructions available)." Below this is a "Support Mylyn by voting on EPIC" button with a "Vote" button.

There are two sections for "New users" and "Eclipse 3.2 users". The "New users" section states: "you can download Eclipse with Mylyn in most of the Eclipse Bundles, then look updates using the sites below. Eclipse 3.2 users: use the Mylyn 2.0 release." The "Eclipse 3.2 users" section states: "All downloads are provided under the terms and conditions of the Eclipse Foundation Software User Agreement unless otherwise specified."

The "3.0.2 Release" section includes a "New & Noteworthy" note: "(Released 2008-09-18). Requires JRE 5.0. Supports Bugzilla 2.18 and later." Below this are four download links:

- download.eclipse.org/tools/mylyn/update/e3.4 (Eclipse 3.4, EPP Packages)
- download.eclipse.org/tools/mylyn/update/e3.3 (Eclipse 3.3)
- download.eclipse.org/tools/mylyn/update/extras (Eclipse 3.3 and 3.4) Trac 0.9 and 0.10, JIRA 3.3.3 and later
- download.eclipse.org/tools/mylyn/update/incubator (Eclipse 3.3 and 3.4) Web Templates (Generic Web Connector), XPlanner 0.7 and later, UI Usage Reporting, UI Experiments

Scaricate da questo sito <http://www.eclipse.org/mylyn/downloads/> la versione base di Mylyn e gli extras. Scegliete in base alla vostra versione di Eclipse.

Scompattate gli zip che ottenete dai link di download e inseritene i contenuti nelle rispettive directory di installazione del vostro Eclipse.

Se non riuscite a scaricare i file zippati potete ottenerli anche da questo sito (per la versione Eclipse 3.3)

Buon lavoro!
